QUESTION 1

Draw the SDLC with all 7 phases and the deliverable of each phase

UniPlan | Software Development Life Cycle

1

PLANNING

Define project scope, team roles, schedule, resources, and feasibility.

DELIVERABLE: Project Plan and Feasibility Report

↓

2

REQUIREMENTS

Gather and document student and admin needs, including study-plan tracking and registration rules.

DELIVERABLE: Software Requirements Specification (SRS)

↓

3

DESIGN

Design the system architecture, database, user interfaces, and UML diagrams.

DELIVERABLE: System Design Specification (UML, database schema, and UI designs)

↓

4

IMPLEMENTATION

Build student and admin features, registration checks, the API, and database.

DELIVERABLE: Working UniPlan Application and Source Code

↓

5

TESTING

Test prerequisites, credit-hour limits, schedule conflicts, duplicate registration, and section capacity.

DELIVERABLE: Test Plan, Test Cases, and Test Report

↓

6

DEPLOYMENT

Configure and release the tested system for students and administrators.

DELIVERABLE: Deployed System and User Guide

↓

7

MAINTENANCE

Fix defects and update courses, sections, schedules, and registration rules for future semesters.

DELIVERABLE: Maintenance Updates and Bug Fixes

QUESTION 2

Fill a table that maps each phase to our Course Registration project

Phase-by-phase deliverables and project-specific work

SDLC Phase	Deliverable	Course Registration Project
Planning	Project Plan	Define the project scope, team roles, schedule, and resources for a system that lets students register for and drop courses.
Requirements	Software Requirements Specification (SRS)	Document requirements such as course registration and dropping, capacity limits, student accounts, and administrator course management.
Design	System Design Specification	Create use-case and class diagrams, design the database, and plan screens for course search, registration, and administration.
Implementation	Working Application and Source Code	Build the application, database, and user interface for students and administrators.
Testing	Test Plan, Test Cases, and Test Report	Test that students can register for available courses, full courses reject additional registrations, and duplicate registrations are rejected.
Deployment	Deployed System and User Guide	Release the working system for students and administrators, and provide instructions for using it.
Maintenance	Maintenance Updates and Bug Fixes	Fix issues and update course offerings, capacity limits, and system features for future semesters.
